SUMMARY

Full Stack Engineer with 3+ years of experience building and scaling SaaS applications and AI-driven platforms in fast-paced startup environments. Strong background in delivering end-to-end frontend and backend solutions, with a focus on performance, user experience, and maintainability. Experienced in leading frontend development, translating business requirements into reliable software, and collaborating cross-functionally to deliver high-quality products.

WORK EXPERIENCE

February 2024 - Present

Software Engineer

- Led frontend development of ContentStudio using Vue.js, while contributing to Laravel APIs, public API development, and backend MCP integrations.
- Designed and implemented AI-driven content features, including AI image generation, AI video generation, and Reels/Shorts Clipping for brand-ready social content.
- Resolved customer-reported issues, monitored production errors using Sentry, and improved reliability through unit, regression, and E2E testing.
- Led frontend code reviews, provided technical guidance, and drove dependency upgrades and refactoring to reduce technical debt.
- Collaborated in an Agile/Scrum environment with product managers, designers, QA, stakeholders, and developers to deliver features and milestones on time.

Junior Web Developer

Sept, 2022 – Jan, 2024

- Contributed to multiple client projects across frontend and backend development, supporting feature implementation and delivery.
 - Built responsive, user-friendly landing pages and collaborated with designers to translate UI/UX designs into functional interfaces.
 - Developed full-stack client websites, handling frontend implementation, backend integration, and API connectivity.
 - Collaborated with cross-functional teams to ensure code quality, usability, and timely delivery of client requirements.
-

PROJECTS

DiagnoALL

- Led end-to-end development of a full-stack Next.js healthcare application, owning architecture and implementation.
- Implemented secure authentication (NextAuth), database management with Prisma & MongoDB, and real-time chat using Pusher.
- Used Redux Toolkit Query for scalable state management and API integration.
- Integrated a CNN-based AI model for blood cancer diagnosis.
- Implemented blockchain payments and decentralized storage to handle sensitive patient data

EDUCATION

BACHELOR OF SCIENCE IN SOFTWARE ENGINEERING
COMSATS University Islamabad

2020 - 2024
